

Project Initialization and Planning Phase

Date	2 July 2026
Team ID	
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A male applicant seeking a loan.	Secure a loan for the property	Married with no co-applicant income.	Self-employed with a good credit history.	Optimistic about loan approval.

Customer Problem Statement Deliverables

Since the template template is an image, the detailed problem statements have been populated in the table below:

Customer / User	I am trying to...	But (Pain Point)	Because (Root Cause)	Which makes me feel...
A farmer seeking suitable crops for cultivation	Select the best crop based on soil and environmental conditions	I don't know which crop is suitable for my land and weather conditions	I lack proper scientific knowledge about soil nutrients, pH, and climate relationships	Worried about crop failure, low yields, and financial losses
An agricultural researcher or policymaker	Analyze agricultural data to improve farming decisions and policies	Processing large amounts of soil and environmental data manually is extremely difficult	Traditional data processing methods are time-consuming and lack predictive insights	Frustrated with slow progress and unable to make data-driven planning
