Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution

SAYS • 'I want to improve crop yield.' • 'I need accurate crop recommendations based on my soil.' • 'Weather conditions are changing rapidly.'	THINKS • 'Which crop is best for my land?' • 'Will I get good profit or face losses?' • 'How do I handle chemical measurements?'
Anand (Farmer/ Small-scale)	
DOES • Checks soil conditions using kit measurements. • Consults neighbor farmers and local agents. • Inputs values into OptiCrop interface.	FEELS • Worried about crop failure and losing capital. • Confused about balance of fertilizers. • Hopeful that AI can guide him to better harvests.
