Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	1. Soil Testing & Input	2. Engine Analysis & Output	3. Execution & Harvest
Actions <i>What does the customer do?</i>	Farmer measures Nitrogen, Phosphorous, Potassium, temperature, humidity, pH, and rainfall using field test kits.	Farmer accesses OptiCrop portal, inputs numbers into form, and hits the 'Analyze' button.	Farmer implements recommendation (adds specific deficient nutrients, sows the optimal crop seeds).
Touchpoint <i>What part of the service do they interact with?</i>	Physical soil testing sensors, local climate monitors.	OptiCrop web application forms (Scenario 1 & 2 UI pages).	Physical agricultural field, local seed/fertilizer distributors.
Customer Thought <i>What is the customer thinking?</i>	"Will these soil values help me make a profit or will I pick the wrong crop?"	"The interface is simple and clean. Will this AI recommend a realistic crop for my land?"	"Now I have a clear plan. I'll add the recommended Nitrogen and grow Rice."
Customer Feeling <i>What is the customer feeling?</i>	Anxious, uncertain, confused by raw soil numbers.	Hopeful, curious, excited about technology assistance.	Relieved, confident, empowered with an actionable strategy.

Process Ownership <i>Who is in the lead on this?</i>	B Prudhvi Raj	B Prudhvi Raj	B Prudhvi Raj
Opportunities <i>How can we improve this stage?</i>	Provide a guide on how to sample soil accurately. • •	Show visual gauges and clear compatibility scores. • •	Provide a fertilizer calculator to estimate the exact bags of nutrients needed. • •
